Program **Highlights**

This immersive learning program equips you to establish yourself as a skilled AI-powered enterprise transformation expert. Learn from the best GenAI experts in the industry with our comprehensive hands-on course.

Learn with 16 Hours of **Live Expert-Led Training**

Engage in 30+ **Hands-On Exercises** with AI Tools

Work on 4 Live **Real-World Projects**

Learn by Doing and Work with **Advanced AI Tools**

Learn to Utilize 200+ **Ready-to-Use AI Prompts**

Learn with **Practical Use Cases** for Business Analysis

Earn **16 PDUs and 16 SEUs** on Course Completion

Enhance Productivity with **Time-Saving Techniques**

Master **AI-Integrated Workflows** across Transformation

Real-World Simulations on Distributed Agile Environments

This Course is for:

The Gen AI for Enterprise Agilist course is designed for forward-thinking professionals who want to harness the power of Generative AI to accelerate enterprise agility.

Agile Coaches

Program Managers

Transformation Leaders

Product Owners

Product Managers

Agile Delivery Leads

Release Train Engineers

Project Managers

Portfolio Managers

Scrum Masters

Technology Stakeholders

Prerequisites

01. Familiarity with Agile frameworks (Scrum, Kanban, SAFe)
02. Experience of working across multiple agile teams or programs
03. Exposure to program/portfolio-level agile planning
04. Experience in stakeholder communication and alignment
05. Basic understanding of Gen AI tools like ChatGPT
06. Familiarity with JIRA, Confluence, Trello, Mural, etc.
07. Involvement in Agile transformation or process improvement

Get the **upGrad KnowledgeHut Edge**

Comprehensive Curriculum: Structured modules covering fundamental and advanced concepts of Generative AI.

Immersive Learning: Learn, practice, gain insights and apply Gen AI skills to drive change and unlock new possibilities.

Interactive Experience: Engage with peers and instructors through forums and discussion boards.

Practical Use Cases: Analyze and learn from real-world case studies and success stories.

Feedback and Assessment: Receive personalized feedback on assignments and projects.

Networking Opportunities: Connect with fellow course graduates and professionals in the field.

Cutting-Edge Tools and Technologies: Hands-on experience with leading Generative AI tools and platforms.

Learn from the Best: Learn from industry experts and attend special sessions from thought leaders.

Gen AI Certification: Earn a certification to validate your Gen AI skills in Agile coaching and Scrum Master roles.

Support and Resources: Unlimited access to learning resources and assistance with any technical issues

Your Path to Becoming an **AI-Powered Enterprise Agilist**

Our structured learning path combines live interactive sessions, practical exercises, and real-world case studies to ensure you gain a deep understanding of AI applications in enterprise transformation. You will gain hands-on experience with cutting-edge AI tools, apply AI-driven strategies to daily tasks, and receive personalized feedback to refine your skills.

Learn

- ⦿ through live interactive instructor-led sessions by experts

Master

- ⦿ AI tools for the complete transformation cycle

Apply

- ⦿ 200 AI prompts for daily Business Analysis activities

You're now an AI-Powered Enterprise Agilist

Study

- ⦿ real-world case studies curated for Enterprise Transformation

Practice

- ⦿ with 30+ Hands-On Activities and Exercises

Get Hands-On

- ⦿ with assignments and receive personalized feedback

Showcase Your AI Expertise with Real-World Projects

Bridge the gap between theoretical knowledge and practical application by building real-world projects that reflect real-world Agile transformation scenarios. By working on these projects, you'll not only deepen your understanding of Generative AI but also enhance your problem-solving skills and creativity.

AI-Augmented PI Planning: Streamline PI planning with GenAI and generate risk-mitigated program boards.

Smart Dependency and Risk Management: Utilize generative AI to analyze and mitigate risks.

AI-Enhanced Inspect and Adapt Workshop: Analyse and create actionable I&A summary decks.

Intelligent Portfolio-Level Reporting: Simulate portfolio summaries, forecast risks, and generate dashboards.

GenAI Strategy for Enterprise: Create roadmap for AI-powered Agile transformation at scale.

... and the Latest Industry-Relevant AI Tools

Course Curriculum

Module 1: Introduction to Generative AI in Agile Leadership

Explore the fundamentals of generative AI and its transformative impact on Agile leadership, collaboration, and delivery. Get hands-on with leading AI tools and real-world Agile use cases.

Module 2: AI in Lean Portfolio Management

Learn how AI streamlines strategic planning, value stream mapping, and business case development in Lean portfolio management. Experience AI-driven prioritization and decision-making.

Module 3: AI-Driven Program Backlog Management & PI Planning

Master the use of AI to automate backlog grooming, feature creation, estimation, and risk identification for more effective PI planning. Experience hands-on automation of Agile program workflows.

Module 4: AI for Agile Coordination & Syncs

Discover how AI can streamline Agile coordination by tracking progress, identifying dependencies, and resolving impediments. Leverage AI insights to enhance team synchronization.

Course Curriculum

Module 5: AI-Powered Sprint Planning

Harness AI to optimize sprint planning through automated task breakdown, capacity planning, and goal setting. Integrate AI with popular tools for smarter, faster planning.

Module 6: AI in Daily Stand-ups & Team Syncs

Utilize AI to automate daily status updates, identify blockers, and summarize team health during stand-ups and syncs. Improve team communication and transparency with AI tools.

Module 7: AI in Inspect & Adapt Workshops

Enhance retrospectives and continuous improvement workshops with AI-driven analysis, root cause identification, and performance forecasting. Drive actionable improvements with data-backed insights.

Module 8: AI for Agile Product Ownership

Empower product owners to write user stories, acceptance criteria, and non-functional requirements more effectively using AI. Streamline backlog management and story splitting with AI prompts.

Course Curriculum

Module 9: Metrics & Dashboards with AI

Leverage AI to generate actionable OKRs, KPIs, and visual dashboards that drive Agile team performance. Use predictive analytics to enhance quality assurance and forecast trends.

Module 10: Workflow Automation

Automate Agile workflows by integrating AI with tools like Jira, Asana, and Zapier for seamless operations. Streamline repetitive tasks and boost productivity with AI-powered automation.

Module 11: AI for Agile Transformation Roadmap

Apply AI to assess Agile maturity, design transformation roadmaps, and establish governance for successful Agile adoption. Use AI insights to craft effective communication and team structures.

Module 12: Ethical AI Use & Future Trends in Agile

Examine the ethical implications, governance, and future trends of AI in Agile environments. Learn to identify and mitigate bias while preparing for next-gen Agile+AI integration.
